## Summary

Frontend Developer with 8+ years of experience building scalable and intuitive web applications. Specialized in Vue.js, Nuxt.js, and React, with strong expertise in headless eCommerce architectures, design systems, and SEO/performance optimization. Skilled at translating complex processes into clear, user-friendly interfaces while collaborating across teams to deliver business value.

---

## Experience

### Frontend Developer

HCLTech

01/2023 - Present

- Developed scalable headless e-commerce solutions using Nuxt.js, Vue.js, and TypeScript across multiple projects, evolving from Vue 2/Nuxt 2 to Vue 3/Nuxt 3.
- Integrated Bloomreach Content & Discovery with SAP Commerce Cloud and Coveo, enabling advanced personalization and seamless content management.
- Designed and implemented a modular frontend architecture for rapid, brand-agnostic deployments.
- Built and maintained lightweight Node.js API endpoints to support dynamic content and integrations.
- Applied Figma tokenization for dynamic styling, ensuring UI consistency aligned with design updates.
- Used Storybook for component-driven development, testing, and documentation, enhancing design reliability.
- Used Jest for unit and integration testing, ensuring code reliability and stability.
- Prioritized performance, accessibility, and SEO best practices to optimize user engagement and conversion rates.
- Collaborated closely with UX/UI teams to deliver cohesive and performant user experiences.

### Frontend Developer (freelance)

SEOMonitor.com • Bucureşti

03/2023 - 09/2024

- Developed a React-based AI article generator microfrontend, integrated inside a Vue project.
- Managed complex state handling, API interactions, and cross-framework route synchronization.
- Refactored ~90% of the codebase, improving scalability and UX.
- Enhanced UI for handling large volumes of generated data, ensuring responsiveness and clarity.

### Frontend Developer

SEOMonitor.com Bucharest

01/2020 - 01/2023

- Developed Vue based frontend applications using a component-driven approach, building everything from atomic components to full pages to create cohesive and visually appealing user interfaces.
- Took ownership of task creation and prioritization, collaborating closely with backend engineers to ensure smooth integration between frontend and backend features.
- Developed a React-based AI article generator microfrontend integrated within the Vue application, refactoring ~90% of the code to improve architecture, handle complex state management, API interactions, and synchronize routing between React and Vue.
- Collaborated with product managers, designers, and QA teams to deliver reliable and polished features within project deadlines.
- Stayed current with frontend technologies to maintain efficient project execution and scalable solutions.

### Web Developer

eJump Media, Online Identity and Web Development Agency • Bucureşti

03/2018 - 01/2020

## **Developing:**

- Developed web applications covering both frontend and backend functionality.
